

**BUILDING THE FUTURE...
RESTORING THE PAST!**

DIVERISIFIED SERVICES...UNVARYING QUALITY

DAL Construction, LLC is committed to providing our customers with quality craftsmanship, a commitment to safety, total quality control, and superior project management capabilities.

Quality Craftsmanship

DAL always strives to provide quality craftsmanship and control on all projects. DAL begins with evaluating and prequalifying each subcontractor to be assured of their ability to perform on the particular project. DAL provides training to their Superintendents and Project Managers in Construction Quality Control Management to ensure detail orientation and a well managed project. Each Superintendent and PM is a certified CQCM.

Commitment to Safety

DAL's number one priority on every project is SAFETY! Safety plans are provided for each project as well as weekly safety meetings for all subs and employees. DAL has had no OSHA recorded accidents since the business started in 2009 and we intend to keep it that way with proper training and communication. All of our Superintendents and Project Managers are OSHA certified.

Project Manager/ Superintendent Capabilities

Our Project Managers and Superintendents have over 50 years of combined experience managing construction projects. DAL has an experienced Professional Engineer on staff as well as trained PM's and Superintendents. In addition, the support of our Contract Administrative teams make the flow of each project run smoothly.

Total Quality Control

DAL prides itself on its procedures to ensure total quality control on every project. The Project Managers and Superintendents are trained in DAL's 3 phase procedure for TQC for each definable feature of work. The three phases include the preparatory phase, initial phase, and the follow-up phase.
